Improve Your Office Environment Now!

Today's office environment, featuring numerous corridors, unexciting beige or white walls, and often rows of identical, windowless cubicles, might not inspire comfort, beauty, and energy. However, there are some easy, inexpensive ways to make your office space more inviting.

Air quality

- Add some green plants to the décor. Plants offer a natural filtration system, increasing oxygen levels. Nonflowering plants should be preferred, as they will not scatter pollen.
- A small, tabletop air purifier helps improve stale air and removes dust.

Light quality

- Take breaks and go outdoors. Even just five minutes before or after lunch break will provide your eyes with a respite from artificial light sources.
- Use desktop lamps with full-spectrum light bulbs.
- Install double-glazed windows instead of blinds to reduce glare while maintaining natural light.

Stress relief

- Earplugs or noise-cancelling headphones can block distracting noise in an open office floor plan.
- Photographs of loved ones and places we have visited for vacation are reminders of our life away from the office. Select a few favorite pictures as important decorative elements.

Dear readers, if you have tips to add to this list, send them in and they will be published in next month's issue.
